The names of all sponsors will be prominently acknowledged in all participants' materials and displayed at the function. Several sponsors may wish to join together to contribute to the larger events.

Please fax this form back to the EERI office **as soon as possible**, at (510) 451-5411 or mail it with check made payable to EERI.

Questions, call Sonya Hollenbeck at EERI (510) 451-0905.

Description of Sponsored Events

Meal Functions:

All sponsored meal functions will include your organization/company's name listed in the notebook, recognition from the podium and a sign at the function listing your sponsorship. For sponsorship \$5,000 and above, besides the listed benefits, tent cards of your sponsorship will be put on all the tables (where applicable), the opportunity to include a full page insert in the notebook describing your company/organization's services and products, and one free registration for each \$5,000 increment.

Welcome Reception: Tuesday, February 12, 2013 at 6:00-7:30 pm. This is an informal icebreaker for those members who have arrived early to the meeting and want to get-acquainted. An opportunity for the long time members to meet the newer ones.

Breakfast: Three are scheduled for the meeting. This is a light breakfast with pastries, coffee, and juice located in the exhibit area.

Coffee Breaks: Three are scheduled for the meeting. There will be mid-morning breaks on Wednesday through Friday. All the breaks will be held in the exhibit area.

Lunches: Three lunches are scheduled for the meeting. On Wednesday, the Distinguish Lecture, on Thursday, Awards and Business Meeting, and Friday there will be the William B. Joyner lecture and Seismic Design Awards.

Reception, Poster Session and Student Competition: We will have posters from our students, professionals and the **10th Annual Undergraduate Seismic Design Competition** which will be held throughout the Annual Meeting. The competition is an opportunity for undergraduate teams to design, analyze, fabricate (with balsa wood), and subject a scale model of a high-rise office building to earthquake motions.
